

Rodent Sightings

https://ctrlalftfk.github.io/HeatMaps_NYC_Rodent_Sightings/Marker_Clusters

The rodent data for this project was taken from a json in [opendata.cityofnewyork.us](https://data.cityofnewyork.us/)

The map was created with openstreetmap.org. You are capable of zooming in or out.

The heat markers were programmed with JavaScript and stylized with leaflet and CSS. They change as the map is zoomed in or out.

The page is mobile responsive so it should work on most phone and tablets as well as web browsers.
